STATINTL

[REDACTED]

Dear Maurice:

STATINTL

You will recall the recent visit by [REDACTED] concerning work being carried out on the contract in which we are mutually engaged. He wished me to express to you how extremely pleased we are with the progress being made by Lee and yourself in this work.

I believe George also again discussed the matter of material charges being made either to the contract or to the G.F.E. fund available for carrying out special tasks associated with, but not directly under, the scope of the contract. You will recall the meeting held with contracting people in Los Angeles on April 13th, during which they requested a materials estimate for carrying out this special work prior to actual expenditure. It is therefore requested that you please submit a materials estimate, prior to expenditure, for material to be expended both under the present work statement and chargeable to the contract, and for materials falling outside the scope of the contract and therefore chargeable to the special fund set up by the customer. Unless we receive and approve these expenditures, we cannot guarantee reimbursement.

Again, let me assure you we are well satisfied with the work being carried out and only wish to clear up these administrative matters.

Sincerely yours,

STATINTL
